

YOUR LIFT & COVID-19

PROTECTIVE LIFT BUTTON COVERS

As your business implements enhanced and more frequent hygiene measures, Accel Lifts' **Protective Push Button Covers** are designed to prevent sanitising fluids entering into your lift buttons which can result in damage and lift breakdowns. Specially designed to be suitable for both lift cars and landings, the **durable cover** is easily installed and **enables a faster and easier cleaning process** of your lift.

Our team of Lift Experts have assembled a range of COVID-19 support measures for all budgets. For further information on these resources, please contact a member of our team on **service@accel.ie** or call **+353 1 490 4555**

For General Enquiries, please call:
